

COMPANY PROFILE

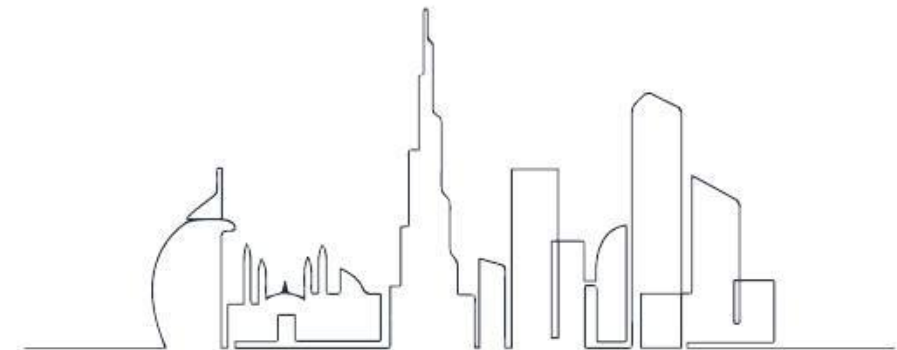

A LEADING CONSTRUCTION & INTERIOR FIT-OUT SPECIALIST

HAO CONTRACTING FOCUSES ON PREMIUM PROJECTS AND PROVIDES

FULL-RANGE PROFESSIONAL SOLUTIONS

AND AI DRIVEN CONSTRUCTIONS.

ABOUT US

HAO CONTRACTING

Hao Contracting is a leading construction and fit-out company specializing in high-end commercial, hospitality, residential, and mixed-use developments. With a portfolio spanning landmark projects across Shenzhen and other major urban centers, the company has built a reputation for delivering premium-quality construction with precision, efficiency, and uncompromising attention to detail. Driven by a commitment to excellence, Hao Contracting has successfully delivered large-scale luxury hotel interiors, high-rise apartment fit-outs, commercial towers, and award-winning developments in collaboration with some of the region's most respected developers and real estate groups. The company combines technical expertise, modern construction methodologies, and strong project management capabilities to execute projects that meet international standards in both quality and design.

From luxury hospitality projects such as Raffles Hotel Shenzhen Bay No.1 to high-end residential developments within landmark CBD towers, Hao Contracting consistently focuses on craftsmanship, engineering coordination, and refined finishing standards. Every project is approached with a deep understanding of functionality, aesthetics, and long-term value creation. Backed by an experienced team of professionals, skilled workforce, and a strong network of suppliers and partners, Hao Contracting provides end-to-end solutions covering interior fit-out works, decoration engineering, MEP coordination, project execution, and project management.

At its core, Hao Contracting is built on reliability, innovation, and a vision to shape exceptional spaces that elevate the standards of modern construction.

WHY CHOOSE US

Proven Landmark Project Experience

We have successfully completed a wide range of large-scale luxury hospitality, residential and commercial projects, delivering construction quality that meets international standards.

Strong Project Management & On-Time Delivery

Our professional project team ensures efficient site coordination, transparent communication and strict progress control, guaranteeing high-quality and on-time project delivery.

Specialized Welding & Structural Steel Expertise

Precision welding and structural steel works are our core strengths. All construction processes are implemented with rigorous quality control to meet the highest industry standards for stability and durability.

End-to-End Integrated Construction Solutions

We provide one-stop construction services covering general contracting, high-end interior-fit-out, MEP coordination and overall project supervision, delivering reliable and fully integrated solutions.

2025 TASHKENT ASIAN YOUTH GAMES & PARAGAMES VENUES PROJECT

Steel Structure And Installation Engineering

Project Cost:

289 million USD

Total Building Area:

103333.2 m²

Land area

about **100.42-100.6** hectares

Total construction area:

about **103,000-120,000** square meters

Main venues 5 indoor halls

Main Stadium:

15,000 seats, for opening & closing ceremonies, track and field and football events.

Multi-purpose Ball Games Hall:

2,000 seats, suitable for basketball, volleyball, badminton and other events.

Natatorium:

2,000 seats, for swimming and diving competitions.

Velodrome:

2,000 seats, adopting single-layer cable net steel structure.

Combat Sports Hall:

2,000 seats, for boxing, judo, taekwondo and other combat events.

Outdoor facilities:

15 sports courts including football, basketball, tennis, beach volleyball, extreme sports, etc.

Auxiliary buildings:

main office building, canteen, energy center, photovoltaic power system, roads and pipe networks, etc.

Technical Standards & Features

Design standard:

Fully adopt Chinese standards covering architecture, structure, electromechanical system, fire protection and civil air defense, complying with international event requirements of the Olympic Council of Asia.

Structural highlights:

Main Stadium: Large-span steel structure with tensioned membrane roof

Velodrome: Single-layer cable net roof with patented Chinese technology

Green & intelligent construction

Full-roof photovoltaic power system for self-generation and self-consumption

Full 5G coverage, intelligent operation and maintenance, full-life-cycle BIM management

3D digital twin technology for digitalized construction and operation management

Seismic fortification:

Designed in accordance with seismic intensity grade 9 for high earthquake-prone areas in Tashkent

Event & Post-event Operation

In-event function: Serve as the main venue of 2025 Asian Youth Games and Asian Para Youth Games, hosting opening & closing ceremonies and all major competitions.

Post-event positioning:

Tashkent sports and cultural center

National youth sports training base

Public fitness center, exhibition venue, performance venue and commercial complex
